# Deliver the software your team needs... securely and at scale.

Start deploying from a library of over 15k packages within minutes. Enforce policies, manage vulnerabilities, and keep every package patched — automatically.

The screenshot displays the Workbrew Fleet Security Status dashboard for 'acme-corp'. The interface includes a left-hand navigation menu with options like Dashboard, Vulnerabilities, Devices, Packages, Default Packages, Policies, Brew Commands, Brew Configurations, Settings, Contact, Documentation, Changelog, and workbrew.com. The main content area is titled 'Fleet Security Status' and features several key metrics:

- Open Vulnerabilities:** 17 (with a link to 'Review and resolve ->')
- Resolved:** 52 (Secured through automated updates)
- Policy Violations:** 1 (2 devices)
- Outdated Devices:** 3 (Latest 1.6.1)
- Access Mode Violations:** 2
- Failed Brew Commands:** 124

Below these metrics, there are sections for 'Formulae' and 'Casks':

- Formulae:** Total 2,708, Unique 719, Vulnerable 17, Outdated 98. 2,708 Formulae installed across 29 devices.
- Casks:** Total 350, Unique 220, Outdated 77. 350 Casks installed across 29 devices.

The bottom of the dashboard shows contact information: @lukehefson, luke@acme-corp.com.

# Powered by Homebrew built for the enterprise.

Workbrew brings order to your software stack—fast. Ship trusted software at scale, with full visibility into your supply chain.

## **Developer Productivity**

Fast and consistent developer environments with familiar tools.

## **Analytics & Observability**

Comprehensive insights and trends with complete endpoint transparency.

## **Security & Compliance**

Secure by default and built to meet the standards of regulated industries.

## **Remote Management**

Simple and reliable software distribution from a central management console.

## JOHN BRITTON, CEO

John has spent his entire career helping developers be more successful. Early employee at Twilio and GitHub, he's been a Homebrew contributor since 2014 and user and superfan since 2009.
